

# LASER OF FACIAL VEINS/FLUSHING

## REDNESS AFTERCARE

Treating facial veins and/or flushing redness like Rosacea is considered cosmetic and is not covered by insurance. Cosmetic payments are due at the time of the treatment.

### DOWNTIME: WHAT WILL I LOOK LIKE IMMEDIATELY AFTER?

There is no down-time with BBL treatments. Immediately after treatment, your face may feel warm and look a little pink, however these things will pass within an hour or two. Facial veins may appear darkened “bruise-like” for up to 2 weeks. Makeup can be applied immediately after treatment. Swelling may be present for 3-5 days post treatment. Using ice packs to the cheeks for 72 hours and sleeping elevated can improve swelling.

Refrain from using any exfoliants, Retinols, etc for 7 days. Wash your face with a gentle cleanser. Make sure you apply facial sunscreen daily. You may apply makeup and other products as tolerated.

Flushing redness can take 3-5 treatments to improve. Facial veins can take 1-3 treatments to improve. This is not a cure for the redness so maintenance treatments may be needed.
